

LAT PULLDOWN/ LOW ROW

machine more
dependent on
human than human
on machine

Performs the
function of
downward rotation
& depression of
the scapulae
combined with
adduction &
extension of the
shoulder joint.

ARTIFICIAL PACEMAKER

human more dependent
on machine than
machine on human

Pacemakers use low
energy electrical impulses
to control the rate and
~~rhythm~~ rhythm of your
heartbeat.

Traditional ones send
electrical pulses through
wires, also known as
leads.

ANGIOPLASTY MACHINE

machine = human

Once catheter is in place, a small amount of contrast is injected through it. Further X-rays are taken and this dye is visible through the machine.
